

20/30

AIRFOIL SUPPLY GRILLE

20/30 Airfoil Supply Grille

The 20/30 Series Airfoil Supply Grille features premium quality, extruded aluminum construction. Individual blades are fully adjustable and the airfoil shape helps to reduce turbulence, leading to low sound and pressure drops.

Single deflection core

Airfoil blades provide superior performance compared to conventional louver blades

Easily integrated with multiple border and mounting options

Double deflection core

Optional double deflection core for additional air pattern control

MULTIPLE CONFIGURATIONS

- + A variety of construction options allow for complete customization and a product that is well suited to most spaces.
- + The 20/30 Series is available with a choice of either a single or double deflection core, five border styles, four fastening options and optional mounting frames.

Optional damper (reverse)

TYPICAL APPLICATIONS

The clean lines and extruded aluminum frame and blades make the 20/30 Series airfoil supply grille well suited to architectural applications.

CONSTRUCTION

- + Model
 - 21 - 3/4 in. spacing, single deflection
 - 22 - 3/4 in. spacing, double deflection
 - 31 - 1/2 in. spacing, single deflection
 - 32 - 1/2 in. spacing, double deflection
- + Available Sizes
 - Maximum one piece: 36 in. x 96 in.
 - Oversized construction available
- + Options
 - Steel damper
 - Aluminum damper

Sidewall mounted, single deflection 20 Series grille

Performance Notes:

- Tested in accordance with ASHRAE Standard 70 – 2023 *Method of Testing for Rating the Performance of Air Outlets and Inlets*.
- Airflow is in cubic feet per minute [cfm].
- NC, sound pressure levels, are based on a room absorption of 10 dB re 10⁻¹² Watts, and a single diffuser/grille.
- Blanks "-" indicate an NC level below 15.
- All pressures are in inches of water column [in. w.g.].
- Pressures not listed can be calculated using the following formula:

$$P_{total} = P_{static} + P_{velocity}$$
- Throw data is based on supply air and room air being at isothermal conditions¹.
- Throw data is given in feet [ft] to terminal velocities of:
 150 fpm (minimum)
 100 fpm (middle)
 50 fpm (maximum)

- Deflection** - The listed deflection settings refer to horizontal deflection. For a 20° upward deflection, use the room throw rating for a 0° setting and the total pressure for a 22 1/2° horizontal setting. The performance tables are based on registers with core style 22 with an opposed blade damper. The performance of other core styles, with or without dampers, can be obtained by the application of correction factors to the tabulated performance data. The table of correction factors is included on this page.
- The performance tables are based on registers with Fborder. For ED border, the correction factors on this page must be applied due to the reduced core area for this border.

Corrections for Various Core Styles

Core Style	AK/AC	Multiply		Add NC
		Throw	Total Pressure	
21 & 22 With Damper	0.78	1.0	1.0	0
21 & 22 No Damper	0.83	0.97	0.88	-4
31 & 32 With Damper	0.68	1.07	1.32	0
31 & 32 No Damper	0.72	1.04	1.17	-2

Listed Core Area	Multiply		Add NC
	Throw	Total Pressure	
0.15-0.30	1.30	2.6	+15
0.34-0.90	1.14	1.7	+10
1.07-1.80	1.08	1.5	+5
2.08-6.25	1.04	1.2	+2
